5. Precautions liled

5.Precaut	tionsliled	Quangliled Quanglil
Item		Description
Environmen tal Precautions	Temperature requirement	Storage temperature range: -10 ° C - 30 ° C, over 30 ° C needs to do cooling treatment. Operating temperature range: -20 ° C -40 ° C, other temperature range, need to install temperature control equipment. Lamp surface temperature (working time): ≤60°C, temperature control equipment is required to be installed when temperature exceeding the standard
5. TEN O	Humidity requirement	Storage humidity range: 10% RH-60% RH, humidity over 60% RH requires dehumidification treatment. Operating humidity range: 10% RH-65% RH, If the

TANGL		humidity exceeds the standard, it must be dehumidified before it can be used normally.
B B B B B B B B B B B B B B	Storage overdue processing	If the product has been stored for more than one month, need to do 6 hours of aging test before it can be used. The aging mode is: 10%Full brightness setting-1H, 30%Full brightness setting-2H, 80%Full brightness setting-1H, 100%Full brightness setting-1H (increase brightness gradually in aging test)
B B D D D D D D D D D D D D D D D D D D	Dust-proof requirements	Indoor products have no protection level or IP30, and the display should not be exposed to heavy dusty environments, such as decoration and renovation. Special protection is required to protect the display. Installing LED display screen during decoration is strictly prohibited.
	Avoiding corrosive gas	Corrosive gas contains salt or acid gas in the environment, may cause corrosion of electronic components, crystallization, leakage and so on.
。 温力巨彩 Q IANIGH	Avoiding electromagne tic radiation	The display screen should not be installed in an environment where electromagnetic radiation and radio frequency radiation exceed the field strength of 5V/m interference source.
B B B B B B B B B B B B B B	Avoid strong light Keep away from water	Strong light will affect the display effect and life span of screen. It should be install in the direction where there is shorter direct sun shining. Indoor products have low level of protection, water can make the module short circuit, and leads to circuit device damage, so it is necessary to keep away from the water source.
B 强力巨彩 Q TANG	Electrostatic hazard, Prevent lightning strikes	The metal components of the screen, the shell of power supply and the cabinet should be grounded well, and the grounding resistance should be less than 10Ω . Prevent electrostatic damage to electronic devices in humid environment, while avoiding electric leakage to harm human body.
®) 强力巨彩 Qi TANGLI	Personal injury	The angle and height of the display installation should be appropriate, and the sharp corners should be packaged to prevent damage to the human body from the tough outer casing.
® 分 _{强之巨彩} Q	Special environment	Display screen for special environment (1, seaside, swimming pool, bathing room, basement, tunnel; 2, chemical environment, vulcanization environment, halogen environment; 3, dust, dusty environment; 4, strong ultraviolet environment; 5, the environment of strong electromagnetic fields; 6, less than -20 degrees,

IANGLI		higher than +40 degrees of the environment), The review process is required before placing the order.		
®	Electro-static Protection	The worker must wear an anti-electrostatic wrist strap and anti- electrostatic glove. Various tools must be strictly grounded during assembly		
) _{選力巨彩} Qi IANGU	Product batch control	Different batches of products cannot be installed in the same screen, otherwise there will be color blocks (mosaic) on the display.		
®	Product wiring	The module cannot be directly connected to 220V, and the module positive and negative poles connection must be right.		
ANGII Q	Disassembly and transportation	Do not throw, push, squeeze or press the module to avoid damaging the display screen.		
®	Disassembly and maintenance liquid protection	Sweat or other liquid cannot be dripped on the display screen during disassembly and assembly operation. If it is dripped, then use alcohol to clean the product, to prevent the liquid from corroding the product.		
Operational precautions	Installation Torque Control	In connection with power supply, it is necessary to ensure tightening of terminal joint screw to prevent joint position from loosening, resulting in wire burning or product damage caused by high contact resistance. Torque of M4 screw is 6.0-8.0 Kgf.cm, and that of M3 screw is 4.0-6.0 Kgf.cm.		
JANG LI	Drobibitod	It is forbidden to assemble the LED module when the power is on. The LED module should be assembled with the main		
® Manes Qi IANG LI	Prohibited work with electricity	power input disconnected. It is not allowed to insert the power wire and signal cable when there are with electricity.		
®	Prohibited touch with electricity	It is forbidden for people to touch the LED display screen when the LED screen is in usage, so as to avoid electrostatic breakdown of LED lights and chips and other components caused by human body friction.		
_{通力巨彩} Qi	anglilled	Temperature and humidity meters should be equipped on the installation site to monitor the surrounding		
	Environmenta I inspection	environment of the screen in time. After heavy rain, it is necessary to check whether there are any problems such as dampness, water droplets and over humidity in the		
® 了 强力巨彩 Q	Requirement	screen in time. ent Fixed Within 10% ~ 65% RH relative humidity		

s for mo		range, it is recommended to turn on the
proof	Display	display 1 time per day, and work at least 4
	Screen	hours to remove moisture on the display.
		When the relative humidity of the
D ape和Qiangli	led 6	environment is over 65% RH,
了。 是为巨彩 Qiang"	温旭	dehumidification treatment should be carried
IANGLI	TANG	out for the operating environment. It is
		suggested to use the screen for more than
		8H per day in this environment, and doors
		and windows should be closed at night to
为 ® Qiangli	led ®	prevent the display from dampness.
了。 Tanganguanguanguanguanguanguanguanguangua	an the	When the display screen is not used for a
IANG LI	IANG	long time, it is necessary to preheat and dehumidify the whole screen for 8H before
		using, so as to avoid damaging the lamp
		tube after dampness. The dehumidification
		methods are: full brightness set 10%- 1H,
了 _{强力是将} Qiangli	led ®	full brightness set 30% 2H, full brightness
了。 Tang Qiang III	The state of the s	set 60% -2H, full brightness set 80% -2H, full
IANGLI	IANG	brightness set 100% -1H (brightness
		gradually increasing aging).
		After usage , immediately put into flight case
		and seal the flight case;
为 _{海边影} Qiangli	led 6	In each flight case, please put a desiccant or
了。 Tane Qiang	是·拉耳	hygroscopic bag of not less than 50g.
IANGLI	IANG	In the range of 10% to 65% RH relative
		humidity, the screen should be lighted on
		more than 2H every half month; More than
		65% RH and in the resurgence weather, the
D _{連浩} Qiangli	led ®	screen must be lighted on more than 2H
了。 Pane Qiang III	Rental 强力巨	every week. After finished the display, need
IANGLI	screen	to put it back to flight case, sealed and
	display:	stored. (please check whether there is any
	2.50.63	failure of the desiccant or hygroscopic bag in
		the aviation, it needs to be replaced every 2
®	led 6	months, and more desiccant can increase
D ape就Qiangli	The HE	the dryness inside the box.)
TANGL	TANG	When the display screen is not in use for a
		long time, it is necessary to reduce the
		brightness of the whole screen by 50% in
		advance and play it for 12 hours, and
8	led 6	preheat it for "dehumidification" 12H to avoid
Danial Qiang	温力巨	damaging the light tube after the LED

screen is damped.
